

Folding platform K

The pre-assembled scaffold platform for concrete construction sites

Formwork & Scaffolding.
We make it work.

Folding platform K

The pre-assembled scaffold platform for concrete construction sites

Doka folding platforms K are pre-assembled, work-ready scaffold platforms with standardised system components for usage situations.

Tested safety

for reliable protection

Put the advantages of this EN 12811-1 and DIN 4420 certified Service and Working Scaffold to work for you

- reduced costs, due to fast, safe working
- high load-bearing capacity (max. 600 kg/m²) means that wall formworks up to 5.50 m high can be stood on the platforms
- unobstructed, flat platform deck made possible by the retractable crane-hoisting points
- with practical add-on components for every usage situation

Rapid working

thanks to easy handling

Reduced labour and crane times, thanks to

- pre-assembled units
- planning where to put the suspension points is easy, thanks to the system's logical concept
- ready for use straight away, after a very few quick and easy actions

Highly cost-efficient

saving you time and money

Achieves cost-optimisation by

- being easy to use
- having a long lifespan
- not taking up much storage and transport space

Versatility

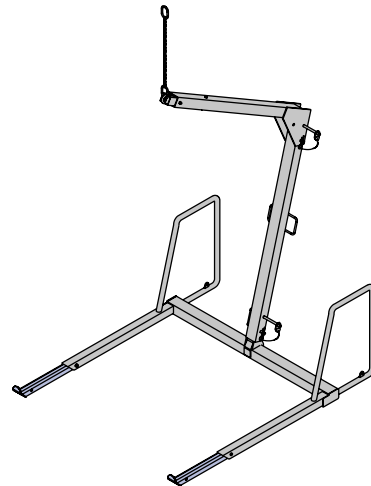

can be used for all types of safety task

Depending on your needs, you can use the pre-assembled scaffold platforms as

- working platforms
- protection platforms
- sloping-rooftop fall barriers
- protective canopies

The quick-to-unfold 'Folding platform K outside corner' provides safe corner transitions without any trip hazards.

The Transport fork K/M plus makes for convenient, easy-to-handle repositioning of standard and corner platforms.
