Flexible slab formwork system for  
any layout or concrete finish

[www.doka.com](http://www.doka.com)

## Flexible slab formwork system for any layout or concrete finish

Dokaflex is the fast, versatile floor-slab formwork for any desired layout. Any type of plywood can be used, so that any concrete surface finish can be achieved based on the requirement of the architect.

### Safe and fast to set up

thanks to a pre-defined system grid

With Dokaflex, you'll be working faster and safer

- only 2 different beam lengths
- the markings on the beams make it easy to set up, with an easy-to-see safety check

### Adaptability to all layouts

thanks to a flexible grid

The flexible floor-slab formwork grid for

- any shape of layout - beams and floor extensions can easily be solved
- perfect adaptability to columns and walls
- adaptable to different slab thickness
- shoring filigree slabs

A Plywood

B Doka beam H20 top16'- 0" and 11' - 6"

C Lowering head H20

D Supporting head H20 DF

E Doka floor props Eurex

F Removable folding tripod

### Highly cost-efficient

thanks to a pre-engineered design

Designed for simple site operations, the system components give you

- very high numbers of re-use cycles
- simplified site logistics
- first-rate concrete surfaces
- reduced jobsite labor costs

Marks on the beams allow for spacing props and stringers at a standard 4' x 8' grid with no measuring required
