

DokaCAD for Revit

System Requirements

The DokaCAD for Revit plug-in itself does not have significantly higher hardware requirements, as it is fully dependent on Autodesk's requirements.

To ensure smooth and efficient performance when working with DokaCAD for Revit, we recommend the following hardware:

CPU

Intel / AMD from 2 – 2.5 GHz

Processors with higher single-core performance are preferred

RAM

Minimum: 16 GB

32 GB – 64 GB for medium to large projects

GPU

DirectX 11 compatible

At least 8 GB VRAM

Storage

NVMe SSD

Approx. 30 GB for installation + additional ≈ 50 GB

OS

Windows 10 / 11 (64-bit)
